WCC PCO #098 – WT-03 Clerestory Remediation - Change Order Narrative

WCC PCO #098 includes supply and installation of new components for WT-3 Clerestory head anchors between D/9.1 and D/13.3 to accommodate new auditorium roof deflection design criteria. Said remediation to existing façade is caused by omission of new auditorium roof deflection design criteria prior to MCN, fabrication and installation of WT-3 clerestory, and subsequent untimely issuance of said criteria in RFI 1130 response after fabrication and installation was completed.

Facts/Notes:

1. Shop Drawing Submittal 084413-020-02 MCN and related Calculation Submittal 084413-020.001-02 MCN were approved February 23, 2015. Said submittals clearly detailed capacity of system to accommodate movement. No corrections, obvious and unambiguous or otherwise, were noted on these MCN shop drawings or calculations pursuant to accommodation of differential building movement. Cover Letter issued by PEA's façade consultant ALT Limited with the aforementioned MCN shop drawing submittals clearly indicated only two items of "Major significance" and that "There are other minor comments, but these should not require resubmission," underscoring that no obvious and unambiguous corrections were noted pursuant to ability of system to accommodate movement.
2. Fabrication and installation of WT-03 clerestory proceeded per MCN disposition. Said work was completed December 2016.
3. RFI 1130 returned January 30, 2017 issued new relative movement design criteria between the auditorium and academic building after the façade was fabricated and installed per MCN submittals, causing WCC's PCO #098.
4. 013300 AA. Defines Submittals marked "Make Corrections Noted": submittals which require only a minor of amount of correcting will be marked "Make Corrections Noted". This mark shall mean that checking is complete and all corrections are obvious without ambiguity. Fabrication will be allowed on work marked "Make Corrections Noted" provided such action will expedite construction and noted corrections is adhered to. If fabrication is not made strictly in accordance with corrections noted, the item shall be rejected in the field, and the Contractor will be required to replace such work in accordance with corrected submittals and at their own expense.
5. Commonly accepted definitions of "corrections," "obvious," and "ambiguity" are attached for clarity.
6. These MCN submittal dispositions provided WCC with approval to proceed to fabrication and installation in accordance with said submittals, without risk of having to make changes to the installed work without compensation for said changes, which are caused by new design criteria issued after the submittal was approved and the work was installed.

- T. In submittals requiring manufacturer's literature, provide complete installation instructions for specified product and any associated miscellaneous material required to complete construction.
- U. The submission of any material, or article, as the equal of the materials or articles set forth in the specifications as a standard shall be accompanied by cost information, illustrations, drawings, descriptions, catalogs, records of tests, samples and any other information for both the specified item and the potential substitute item essential for judging, the quality and the materials, finish and durability of that specified as standard, as well as information indicating satisfactory use under similar operating conditions.
- V. Identify each submission by the Submission Control Number assigned on the Submission List. The control number shall be clearly written on the upper right hand corner of each catalog cut, incorporated into the title block of all shop drawings, included on all transmittals, and on identifying labels affixed to all samples. Items not submitted in this format will be rejected without review.
- W. In the event that all or any portion of a submission is rejected due to nonconformance with packaging and labeling requirements, or for any other reason, the Contractor shall tender a new submission conforming to contract requirements within (10) ten consecutive calendar days, calculated from the submission's rejection date. In no event shall the Contractor be permitted to tender submissions beyond the dates contained in the approved Submissions schedule without written approval of the CM.
- X. Disapproved submissions are to be returned to the Contractor directly.
- Y. No work shall be fabricated, manufactured, or installed from shop drawings stamped "Revise and Resubmit" or "Rejected", and such shop drawings shall be corrected and resubmitted by the Contractor until accepted by the Architect. At least one complete set of "No Exceptions Taken" and/or "Make Corrections Noted" shop drawings shall be kept at the site in the Contractors field office for reference at all times. "Revise and Resubmit" or "Rejected" shop drawings shall not be permitted at the site.
- Z. Submittals marked "No Exceptions Taken": submittals which require no corrections by the Architect will be marked "No Exceptions Taken".

AA. Submittals marked "Make Corrections Noted": submittals which require only a minor of amount of correcting will be marked "Make Corrections Noted". This mark shall mean that checking is complete and all corrections are obvious without ambiguity. Fabrication will be allowed on work marked "Make Corrections Noted" provided such action will expedite construction and noted corrections is adhered to. If fabrication is not made strictly in accordance with corrections noted, the item shall be rejected in the field, and the Contractor will be required to replace such work in accordance with corrected submittals and at their own expense.

BB. Submittals marked "Revise and Resubmit" or "Rejected": when submittals are contrary to contract requirements or too many corrections are required, they will be marked "Revise and Resubmit" or "Rejected". No work shall be fabricated under either of these marks. The Architect shall list the reasons for rejection on the submittals or in the transmittal letter accompanying their return. The submittals must be corrected and resubmitted for approval within ten (10) business days.

WHERE BUILDING IS AN ART Builders

RFI Transmittal

Sciame Construction, LLC | 14 Wall Street 2nd Floor New York NY 10005 United States

PROJECT: CUNY New Academic Building DATE SENT: 1/23/2017
CUN-901 RETURN BY: 1/30/2017

SUBJECT: 1130 - Design Movement between the Auditorium and Main Building RFI ID: 1130

TYPE: RFI TRANSMITTAL ID: 13818

PURPOSE: To Answer VIA: Info Exchange

QUESTION: In reviewing submittal 084426-007-01, the Design Team included a comment that "The structural adequacy of this anchor and the relative movements between auditorium roof and main building still has not been submitted." Please define what the relative movement between the auditorium roof and main building is per design so that Whitestone can provide Yuanda with that information for analysis to ensure that the design movement was adequately addressed in the facade design.

SUGGESTION:

1. SHOP DWG SUBMISSION NUMBERS MUST BE IN SEQUENCE OF THE PREVIOUS SUBMISSIONS.

2. THE CONCERN WAS PREVIOUSLY NOTED IN 2014 UNDER SUBMITTALS 084413-020-01 AND 084413-020-02 ON SHEETS D328, D329, D331 AND Y52 TO VERIFY A LARGER MOVEMENT JOINT TO ACCOMMODATE ROOF DEFLECTIONS. THE NOTE WAS ALSO INDICATED ON RFIS 1033 AND 1033R1.

3. REFER TO ATTACHED ESTIMATED ROOF DEFLECTIONS BY WSP. NOTE: WSP CLARIFIED 50% OF THE SDL HAS ALREADY OCCURRED AND THAT FIGURE CAN BE REDUCED. EVEN WITH THE 50% REDUCTION OF THE SDL DEFLECTION, WE BELIEVE THE CONTRACTOR'S HEAD ANCHOR DETAIL MAY NOT ACCOMMODATE THE ESTIMATED ROOF DEFLECTIONS.

4. REFER TO ASK- 266 FOR SUGGESTION FOR THE HEAD ANCHOR DETAIL TO ACCOMMODATE POTENTIAL MOVEMENT.

SUBMITTAL: Drawings 084413-020-02, Calcs 084413-020.001-02

Ms. No,

Attached is the review for the drawings and calculations referenced above.

There are only two items of major significance:

1. Splice seal. I think they need to fix the non-moving portions of the reinforcing extrusion so that the joint that is intended to move will, in fact, be the joint that moves.
2. I cannot tell if the corner mullion calcs are correct. I would expect to see the mullions rotated 45 degrees in the computer runs to model the principle axis of the mullions, but this is not there.

There are other minor comments, but these should not require resubmission.

Sincerely yours,

Steve Strebel

REVIEWED

By PERKINS EASTMAN at 5:49 pm, Feb 23, 2015

22 February 2015

Ms. Mindy No
Perkins Eastman
115 Fifth Avenue
New York, NY 10003

1. ADDRESS ALT COMMENTS BELOW AND
PREVIOUS SUBMITTAL COMMENTS.
2. CONFIRM CORNER CONDITION CALCS.

Reference: P09.00.517 No. P150222-1

Subject: 2nd Review – Yunda WT1, WT3, & WT8
SUBMITTAL: Drawings 084413-020-02, Calcs 084413-020.001-02

Ms. No,

Attached is the review for the drawings and calculations referenced above.

There are only two items of major significance:

1. Splice seal. I think they need to fix the non-moving portions of the reinforcing extrusion so that the joint that is intended to move will, in fact, be the joint that moves.
2. I cannot tell if the corner mullion calcs are correct. I would expect to see the mullions rotated 45 degrees in the computer runs to model the principle axis of the mullions, but this is not there.

There are other minor comments, but these should not require resubmission.

Sincerely yours,

Steve Strebel

Proposal

COMPANY:	Whitestone Construction Corp.	DATE:	October 25, 2018
ADDRESS:	50-52 49 th Street Woodside, NY 11377	PROJECT:	CUNY New Academic Building 285 Jay Street, Brooklyn NY
ATTN:	James Dearth	DESCRIPTION:	Modifications to the WT-3 Clearstory
PHONE #:	718-392-1800	PREPARED BY:	Kaz Nowak

I propose to perform all labor necessary to complete the following:

Modifications to the WT-3 clerestory

INCLUSIONS:

1. Remove and replace existing bolted steel support brackets
2. Install Unistrut cladding hangers
3. Remove sealant and install new gasket material on the interior and exterior of the clerestory
4. Install new steel bracket on top of the existing head extrusion
5. Patch all through bolt holes

EXCLUSIONS:

1. Materials
2. Equipment
3. Scaffold

SUBTOTAL:	\$248,000.00
OVERHEAD 20%:	49,600.00
TOTAL:	297,600.00

All of the work is to be completed in a substantial and workmanlike manner for the sum of **two hundred ninety-seven thousand six hundred and 00/100 Dollars (\$297,600.00)**.

Payment to be made no later than 30 days after completion of the work. Any alterations or deviation from the above specifications involving extra cost of material or labor will be executed upon written order for same, and will become an extra charge over the sum mentioned in this contract. All agreements must be made in writing.

ACCEPTANCE

You are hereby authorized to furnish all labor required to complete the work mentioned in the above proposal for which WHITESTONE CONSTRUCTION CORP. agrees to pay the amount mentioned in said proposal and according to the terms thereof.
